

## Stop Smoking Patch

The stop smoking patch was introduced as a product that could finally help smokers quit for good without experiencing severe withdrawal symptoms. Unfortunately, the majority of patches on the market do not live up to this claim. They simply introduce small amounts of nicotine into your body, reducing cravings momentarily, but never fully eliminating your chemical dependence. At Ultra Herbal, we carry a stop smoking patch that works entirely differently than other products available today, and it can help you quit for good, without any of the normal withdrawal symptoms.

The Nicocure patch utilizes a proprietary herbal formula that rids your body's need for nicotine. These patches work quickly on a day-to-day basis, allowing the formula to penetrate your skin and move directly into your bloodstream. Nicocure is fast-acting, eliminating your cravings in 30 days or less. Our patches have proven successful for an amazing 97 percent of the people who have used them, which allows us to offer you a money-back guarantee on Nicocure.

Are There Side Effects? Our all-natural patches do not cause any side effects. You may experience dizziness or nausea if you smoke while wearing the patch. However, the formula used in Nicocure makes the taste of tobacco products unpleasant, so cheating isn't usually a problem! If you have questions or health concerns, you should contact a medical professional before starting the program.

Nicocure patches give smokers the chance for freedom from addiction. Even if you have tried every other product on the market and failed to quit, Nicocure's proprietary herbal blend can help you succeed. Within one month's time, you can resume your life as a non-smoker, and you can stay that way for good!
